PRODUCT DESCRIPTION

The Secap 720 envelope sealer eliminates manual wetting, flap folding, and sealing of envelopes. Seals up to 18,000 envelopes per hour. This fully automatic machine turns on once the envelope enters the machine and turns off when the tray is empty. Automatically adjusts to handle envelopes of different thickness, up to 10 envelopes. Its rubber conveyor belt with 5 transport rollers allows for the smooth, irreversible flow of envelopes. The water is fed from a large transparent reservoir alleviating calcification build up. Seals both pointed and rounded flaps. It comes with a variable speed dial, on off switch, and indicator light. The Secap 720 letter sealer is a somewhat portable, desktop unit that is clean and quiet for use in any office or department. If you are doing larger envelopes you can use the Secap 720 Large Tray Model. Shipping and Handling are additional. Shipping Weight 68 lbs. for the Standard Model and 72 lbs. for the Long Tray Model. Ships on a pallet by Motor Freight Carrier. There is a flat 85.00 shipping charge for shipping Dock to Dock within the contiguous 48 states.
